EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Henry Jauden on 3/18/03.

The application has been amended as follows:

- a) cancel claim 19,
- b) amend claims 18 and 21 as follows:

Claim 18 (Amended): A mirror mounting assembly for a vehicle, the mirror mounting assembly having a mounting bar with an opening therethrough defining an outlet, the opening configured to route a wire though the mounting bar, the mirror mounting assembly comprising:

- a mirror housing body configured to support a mirror glass;

- a base member for attachment to the mounting bar and to the mirror housing body, the base member defining another opening therethrough to route the wire from the outlet into the mirror housing body; [and]

- a cap member for attachment to the mounting bar, the cap member and base member cooperable to adjustably attach to the mounting bar and configured to releasably attach to each other, and

a fastener having a terminal opening therethrough for delivery of the wire from the another opening into the mirror housing body, the fastener configured to compress a biasing device to releasably hold the mirror housing body to the base member.

Claim 21 (Amended): A mirror mounting assembly for a vehicle, the mirror mounting assembly having a mounting bar with an opening therethrough defining an outlet, the opening configured to route a wire though the mounting bar, the mirror mounting assembly comprising:

a mirror housing body configured to support a mirror glass;

a base member for attachment to the mounting bar and to the mirror housing body, the base member defining another opening therethrough to route the wire from the outlet into the mirror housing body; [and]

a cap member for attachment to the mounting bar, the cap member and base member cooperable to adjustably attach to the mounting bar and configured to releasably attach to each other,

[The mirror mounting assembly of claim 18 including a pivot assembly,] said pivot assembly being secured with said base assembly about said another opening whereby said wire is routed from the outlet, through the pivot assembly into the mirror housing body.

REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

The claims are allowable over the prior art for at least the reason that the prior art fails to reasonably teach or suggest a locking device having engaged and disengaged positions, the locking device configured to compress the compression element and releasably hold the mirror housing assembly and the mounting rod together when in the engaged position or a fastener having a terminal opening therethrough for delivery of the wire from the another opening into the mirror housing body, the fastener configured to compress a biasing device to releasably hold the mirror housing body to the base member or said pivot assembly being secured with said base assembly about said another opening whereby said wire is routed from the outlet, through the pivot assembly into the mirror housing body as set forth in the claimed combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
